CAREER OBJECTIVE

To obtain a challenging role in a forward-thinking organization where I can leverage my knowledge and skills in Electronics and Communication Engineering. Seeking an opportunity as a Software Engineer to contribute to innovative projects while continuously expanding my technical expertise and adding value to the organization's growth.

EDUCATION QUALIFICATION

- B**achelor of Engineering – Electronics and Communication Engineering**
  CMR Institute of Technology, AECS Layout, Bangalore
  7.57,2026(Pursuing)
- **12th – Science**
  Sri Chaitanya Techno School, Bengaluru
  70.40%, 2020
- **10th**
  Vagdevi Vilas School, Bengaluru
  85.40%, 2018

TECHNICAL SKILLS

Languages: Python, MATLAB,C(Basics)
Frameworks: HTML, System Verilog
Software: Matlab, Solid edge , Keil µ Vision, Cadence, Multisim
Operating System: Windows, macOS

PROJECTS

Thermistor Temperature Sensing Alarm

- **Description:** Designed and implemented a real-time temperature sensing alarm system using thermistor-based analog input. Programmed microcontroller logic using Arduino IDE and Embedded C to process temperature data and trigger alarm alerts. Integrated analog signal conditioning for accurate temperature variation detection and response. Optimized hardware circuit design for reliable thermal sensing and precise alarm activation. Developed a cost-effective solution suitable for basic environmental monitoring and safety systems
- **Tech Stack:** Arduino IDE, Embedded C/C++, Arduino Uno (Microcontroller), Thermistor (NTC), Analog Signal Processing, Buzzer Alarm Circuit.

Software Implementation of a Obstacle identifying Bot

- **Description:** Designed and developed a software-based simulation of an obstacle-detecting robot using Proteus. Created virtual sensor integration and response algorithms to simulate real-time obstacle identification Implement logic for autonomous navigation and path adjustment based on simulated sensor input. Validated the simulation to ensure accuracy in obstacle detection and avoidance mechanisms. Demonstrated foundational concepts in robotics and embedded system simulation within a virtual environment.
- **Tech Stack:** Proteus Design Suite, Embedded C (for microcontroller simulation)

Facial Recognition Software for Regularity Monitoring and Leave Management

- **Description:** Designed and implemented an automated facial recognition system for hospital staff attendance tracking using Python and OpenCV. Utilized real-time image processing and deep learning models to enhance accuracy, security, and reliability. Developed a user-friendly interface with Flask for seamless interaction and operational efficiency. Integrated a robust database for efficient attendance record management and secure data storage. Streamlined clinic operations by automating manual attendance procedures, reducing human error and improving staff monitoring.
- **Tech Stack:** Python, Jupyter Notebook, Flask, OpenCV.

Empowering Rural India with Clean Water: A Swachh Bharat Initiative Using solar powered reverse osmosis

- **Description:** Developed a solar-powered reverse osmosis (RO) water purification system tailored for rural deployment . Integrated embedded microcontroller programming to monitor water quality and automate the purification process. Utilized real-time data from sensors (e.g., TDS, pH) to ensure safe and clean drinking water delivery. Designed energy-efficient operation using solar panels to power the entire system sustainably.Supported the goals of the Swachh Bharat Mission by providing a scalable and eco-friendly clean water solution for underserved communities.
- **Tech Stack:** Arduino IDE, Embedded C, Arduino Microcontroller, Solar Panels, Reverse Osmosis (RO) Filters, Water Quality Sensors (TDS, pH), Pump Control System .

CO-CURRICULAR & EXTRA CURRICULAR ACTIVITIES

Hackathons: Participated in Aptitude 1.1 Hackathon organized by CMR Institute of Technology (CMRIT).

Seminars:

- Attended seminars on higher education, emerging technologies, and industry trends, gaining insights into career pathways and technological advancements.

Online Courses & Certifications:

- c basics for beginners: Learn c fundamentals by coding.
- The Complete Python Bootcamp from Zero to Hero in Python .
- ChatGPT: the complete Bootcamp for Beginner With Practical .
- Python for Everyone Master the Basics of Programming.

Paper Presentation:

- Presented a research article titled “Generative Adversarial Networks(GAN): Introduction and Outlook ”, exploring advancements in generative AI and their future applications.

Workshop:

- Participated in Manthan 2025, a national-level business plan competition.
- Attended the Entrepreneurship Knowledge Workshop focused on innovation, business strategy, and startup development

NSS:

- Actively participated in social service initiatives under the National Service Scheme (NSS) as part of the VTU curriculum.

Cultural Activities:

- Volunteered and hosted an event at CULTURA and AURA, an annual cultural fest organized by CMR Institute of Technology,

PERSONAL DETAILS

Date of Birth	: 12th June 2004
Gender	: Female
Nationality	: Indian
Passport No	: R6997147
Linguistic Competency	: English, Kannada, Hindi
Hobbies	: Painting, Sketching, Stitching, Cooking
